

# APPENDIX E—UNITS

## CONVERSION FACTORS

| Unit                          | multiplied by | Conversion Factor                      | Equals | Unit                           |
|-------------------------------|---------------|--|--------|--------------------------------|
| British Thermal Units (BTU)   | ×             | 778.0                                  | =      | foot-pounds (ft-lb)            |
| British Thermal Units (BTU)   | ×             | 1,054.8                                | =      | joules (j)                     |
| British Thermal Units (BTU)   | ×             | 252                                    | =      | Calories (cal)                 |
| British Thermal Units (BTU)   | ×             | 0.293                                  | =      | watt-hours                     |
| calories (cal)                | ×             | 4.1868                                 | =      | joules (j)                     |
| foot-pounds (ft-lb)           | ×             | 0.001285                               | =      | BTU                            |
| foot-pounds (ft-lb)           | ×             | 1.356                                  | =      | joules                         |
| foot-pounds (ft-lb)           | ×             | 0.1383                                 | =      | kilogram-meters                |
| horsepower (hp)               | ×             | 33,000                                 | =      | foot-pounds/minute (ft-lb/min) |
| horsepower (hp)               | ×             | 550                                    | =      | foot-pounds/second (ft-lb/sec) |
| horsepower (hp)               | ×             | 745.7                                  | =      | watts                          |
| joules (j)                    | ×             | 0.000948                               | =      | British Thermal Units (BTU)    |
| joules (j)                    | ×             | 107                                    | =      | ergs                           |
| kilowatt-hours (kwh)          | ×             | 3413                                   | =      | British Thermal Units (BTU)    |
| kilowatt-hours (kwh)          | ×             | 3.6                                    | =      | Megajoules (MJ)                |
| watts                         | ×             | 44.25                                  | =      | foot-pounds/minute (ft-lb/min) |
| watts                         | ×             | 0.737562                               | =      | foot-pounds/second (ft-lb/sec) |
| watt-hours                    | ×             | 3.41266                                | =      | British Thermal Units (BTU)    |
| barrels of oil (bbl)          | ×             | 0.1590                                 | =      | cubic meters (m <sup>3</sup> ) |
| barrels of oil (bbl)          | ×             | 42                                     | =      | U.S. gallons (gal)             |
| U.S. gallons (gal)            | ×             | 3.7854                                 | =      | liters (L)                     |
| cubic feet (ft <sup>3</sup> ) | ×             | 0.0283                                 | =      | cubic meters (m <sup>3</sup> ) |
| short tons                    | ×             | 2,000                                  | =      | Pounds (lb)                    |
| short tons                    | ×             | 0.9072                                 | =      | metric tons (t)                |
| long tons                     | ×             | 2,240                                  | =      | Pounds (lb)                    |
| long tons                     | ×             | 1.0160                                 | =      | metric tons (t)                |
| metric tons (t)               | ×             | 1,000                                  | =      | Kilograms (kg)                 |
| degrees Fahrenheit (°F)       |               | subtract 32<br>then multiply<br>by 5/9 | =      | Degrees Celsius (°C)           |
| degrees Celsius (°C)          |               | multiply by 9/5<br>then add 32         | =      | Degrees Fahrenheit (°F)        |

## NUMERIC PREFIXES

| Numerical Unit   | Power of Ten | Prefix | Symbol |
|------------------|--------------|--------|--------|
| million trillion | $10^{18}$    | exa    | E      |
| quadrillion      | $10^{15}$    | peta   | P      |
| trillion         | $10^{12}$    | tera   | T      |
| billion          | $10^9$       | giga   | G      |
| million          | $10^6$       | mega   | M      |
| Thousand         | $10^3$       | kilo   | K      |
| Hundredth        | $10^{-2}$    | centi  | C      |
| Thousandth       | $10^{-3}$    | milli  | M      |
| Millionth        | $10^{-6}$    | micro  | M      |

## HEAT CONTENTS

| Material   | Heat Content (BTU) |
|--|--------------------|
| 1 gallon of gasoline                               | 126,000            |
| 1 cubic foot of natural gas                        | 1,030              |
| 1 pound of bituminous coal                         | 13,100             |
| 1 42-gallon barrel of oil:                         |                    |
| Distillate   | 5,800,000          |
| Residual   | 6,300,000          |
| 1 42-gallon barrel of NGL<br>(Natural Gas Liquids) | 3,777,000          |
